Kuhn Krause has teamed up with Montag Manufacturing to bring together two industry leading machines and offer dry or liquid fertilizer options to suit the Gladiator 1205M and 1205 strip tillage systems. From 6-rows to 16-rows, Gladiator 1205M mounted models are available with dry fertilizer (6- or 9-ton hopper)* or 1200 or 1700 gallon liquid fertilizer capacity*. Fertilizer option for 3-point mounted units is trailed on a separate cart. Gladiator 1205 pull type models are all available with a choice between dry fertilizer (6- or 9-ton hopper) or a 1000 gallon liquid fertilizer tank. Kuhn Krause is also able to offer the all new Montag Gen II twin tank fertilizer system. This unique machine allows the operator to blend two products together and place them accurately in the row. The Gen II system is compatible with GPS variable rate and GPS section control.

*Option availability dependant on model
Our machines comply with the North-American safety regulations. In our leaflets, to better illustrate certain details of the machines some safety devices could have been removed. Conforming to the assembly and operator’s manual, in no circumstances must machine be operated without these safety devices in place. All machines are equipped with safety devices which comply with the regulations of the countries in which they are delivered. In the interest of progress, we reserve the right to change without notice any specifications, design or materials listed. Patents filed in several countries.
